

SYED DASTAGIR PASHA

Email: syeddastagird81@gmail.com

Contact number: +971 52 775 8839 Visa Status: **Visit**

Summary

- About 3 years of experience in development of Web Applications with **REACTJS, REACT-NATIVE**, development of mobile application **D3** and Backend **REST Api** with **NodeJS**.
- Hands on experience in **jQuery, JavaScript, Typescript, Ajax, Socket.io, HTML5, CSS3, Bootstrap**.
- Experience on Database(**NoSQL**), **Firebase**, and **MySQL**.
- Good Experience on using design and prototyping tools **Adobe XD, Figma**,
- Exposure to cloud **Amazon Web Services (AWS)** and **GCP**.

TECHNICAL SKILLS

UI	HTML, CSS, React, React-native, typescript, JavaScript, Figma
Server-Side	Node.js, Express. Js, Sequelize, Knex, Firebase
Databases	MySQL
Development Tools	Visual Studio Code, Sublime text
Version Control Tools	Bitbucket and GitHub
Project Management Tools	Jira, Trello
Web Services	AWS (S3, DYNAMODB, SES)

Professional -Experience

Spectrum Technologies.

January 2020 – Till Date

Full Stack Developer

Skillset: React JS, React-native, Node JS, jQuery, typescript, JavaScript, HTML5, CSS3, Bootstrap.

Projects Worked on

Project: Go-masjid.

Role: Full Stack Developer

Environment:

UI	React js, React-native, Typescript, JavaScript, HTML, CSS, Components
Used	Material UI, Axios. Styled Components CSS, Sass.
Server Side	Firebase, Node.js
Tools	Visual Studio Code, GitHub

Description:

"Go-Masjid is an online mobile application that allows users to find nearby mosques. With this app, users can access prayer timings for mosques, locate them on a map, and search for specific mosques, calculating Zakat, Qibla direction, Duas and Askaar, restaurants serving halal/permissible foods.

Responsibilities:

- Convert the design from **Figma** to **React Components**
- Involved developing common components, services, and **custom validator**.
- Design database(**Firebase**) for application.
- Worked on creating services to connect **rest Api using Axios**.
- Worked on **creating Api's** with search across the platform to search masjids and restaurants.
- Worked on creating events and registering events on app.

Worked on login module and session creation and **Access Token Management**.

Al-Danah: Software Design Project

"URL": <https://www.figma.com/proto/ohvfk5jE0IDhWeb3fi3bTJ/Al-Danah?node-id=1-195&starting-pointnode-id=1%3A195>

Project Description:

Role : UI/UX Designer

"Al- Danah " is a software design project with a primary focus on creating an **online pharmacy platform**. The project aimed to provide a user-friendly and secure platform for customers to access **pharmacy services**, order **medications**, and manage their health needs.

Key Responsibilities and Achievements:

- **Figma Design:** Led the design and prototyping efforts using **Figma**, translating project requirements into visually appealing and user-friendly **interface designs**.
- **Collaborative Development:** Collaborated closely with to ensure the design seamlessly aligned with the development phase.
- **Usability Testing:** Conducted usability testing and gathered user **feedback** to make necessary design improvements, resulting in an enhanced user experience.

- **-Tools and Technologies Used:** **Figma**

The "Al- Danah" project allowed me to showcase my skills in user interface design, project management, and collaboration. It was a significant addition to my portfolio, demonstrating my proficiency in creating user-centric designs and enhancing my understanding of the software development lifecycle.

Project: Gigleji

Role : Full Stack Developer

"Link": <https://www.gigleji.com/>

Environment:

UI	React JS, JavaScript
Components Used	Material UI, Axios, Context API
Server Side	Mongoose, Node.js, Express.js, Sequelize ORM
Tools	Visual Studio Code, Bitbucket

Description:

Gigleji is an online application where **Gig Talent**(user) can register with his/her expertise and can work on engagements(jobs) that are posted which are matching with his expertise for full time or part time or project based.

Engager(employer) can register in platform and **post engagement**(job), Gig Talent(user) can apply to the particular engagement(job) and can start working on it based on the contract signed.

Responsibilities:

- Design the screens for **UI flow**.
- Updating existing **React Components** for bug fixes and code changes.
- Worked on creating services to connect **rest Api** using **Axios**
- Worked on **creating Api's** with search across the platform

Worked on login **module** and session creation and **Access Token Management**

Project: Executive Web chat

Role: Full Stack Developer

Environment:

UI	Vanilla JS, jQuery.
Server Side	Node.js, Express.js, Socket.io
Tools	Visual Studio Code, Bitbucket

Responsibilities:

- Setting the application and implementing design using **JavaScript**
- Search **implementation** and showing search results
- Backend server creation and designing **Database**.
- Worked on creating **REST API's** using **Node.js, Express.js** and **Sequelize** as **ORM**
